SatWest Awarded FAA Supplemental Type Certificate for Satcom Kit for LearJet Aircraft

Albuquerque, New Mexico USA – November 28, 2007 — SatWest LLC, a leading source for advanced satellite business solutions, is pleased to announce the Federal Aviation Administration (FAA) has granted a supplemental type certificate (STC) for the SatWest: L-1 Satcom Kit for LearJet aircraft models 31, 31A, 35, 35A, 36 and 36A (under a service agreement with DC Aerospace). Satwest is partnering with Latitude Technologies and Infosat Communications, both in Canada, to bring about this new LearJet Kit.

The convenient, easy-to-use SatWest: L-1 Satcom Kit (utilizing the Iridium® Satellite network) features global security, crew safety, voice and data communications and 2-way short messaging for aircrafts. The unit is an integrated solution for cost-effective asset tracking and flight-deck communications by improving scheduling, operations and maintenance of aircraft while enabling global satellite communications.

“The award will enable SatWest to continue in its position as a leading source for developing affordable, advanced global solutions to government and large corporate entities,” said M. Brian Barnett, founder and chairman of SatWest.

Utilizing the Iridium® Satellite network enables Internet-based aircraft tracking. LearJet owners are able to monitor the movements and status of its aircraft in real-time around the world. Telephone and data access is available everywhere the aircraft is located.

The L-1 Satcom Kit from SatWest, for LearJet aircraft models 31, 31A, 35, 35A, 36 and 36A is available now. For further details visit www.satwest.com, call + (1) 505.255.2499 or email Learjet@satwest.com.
